## ABOUT ME

A highly motivated **computer science engineer** with a good foundation in software development. Specializing in **cross-platform** mobile development using Flutter, with experience in building efficient, user-friendly applications. Seeking a role to contribute my **Flutter** expertise and grow professionally while delivering top-tier **mobile** solutions.

---

## EDUCATION

ESI Sidi Belabbas | 2019 - 2024

### Engineering and Master's degree

Completed an intensive **five-year** program specializing in Computer science systems, covering advanced software **engineering** and culminating in a final project.

---

## WORK EXPERIENCE

Apollo Digital Solutions | 2024 - 2025

### Mobile Apps Developer

Designed and deployed full-featured (mainly e-commerce) applications to the Google Play Store. I demonstrated technical versatility by implementing various state management architectures—including **BLoC**, **MobX**, **GetX**, and **Provider**—to optimize app performance based on project complexity. The role required extensive backend integration, where I adeptly handled **RESTful APIs** and utilized **Firestore services** for real-time databases, authentication, and cloud functions to ensure a seamless shopping experience.

Hz Market | 2023 - 2024

### Mobile Apps Developer

Collaborated to build a cross-platform Inventory & E-Commerce solution using ReactJS, MongoDB, and Flutter, applying Clean Architecture with Provider and GetX. Additionally, I worked with the Hz-Brand team to develop a mobile management application for an architectural firm, utilizing **GetX** for efficient state handling.

# PROJECTS

## HZ Market

Inventory Management & E-Commerce Platform

A **web** and **mobile** application combining inventory management with **e-commerce** functionality, enabling **product management**, stock tracking, and online sales.

## Alraid

Architectural Company Management App

A **mobile** application developed to support the internal management of an architectural company, including **project tracking**, **coordination**, and operational workflows.

## Tech 360

Technology Marketplace Platform

Participated in developing two **mobile** applications (**Vendor App** & **Client App**) for a technology **marketplace platform**, enabling product listings, vendor management, and customer purchases.

## Chiriane

Healthcare Services Mobile App

A **mobile** application designed to simplify access to **healthcare services** by enabling users to **find doctors**, **laboratories**, and **pharmacies**, book **appointments**, request medications, and manage medical services.

## Scrapps

Recycling Management System (France)

Contributed to the development of an **app** for **managing recycling centers**, focused on optimizing logistics, inventory tracking, and operational workflows across multiple sites in **France**.

## Cirilla

Multi-Vendor E-Commerce Platform

As a developer at Apollo Digital Solutions, I was responsible for the customization, maintenance, and feature enhancements of over **20 client** applications built from a shared Cirilla source code.
